Feedback Analysis and Action Taken Report for 2021-22:

The college conducted a feedback collection from its first, second and third-year Bachelor of Arts students through a structured questionnaire to understand their perspectives on various aspects of their college experience. Majority of the students rated the learning values and depth of course content as either "Good" or "Very Good," but there were a small number of students who found these aspects to be "Poor" or "Satisfactory," which indicates that some areas require improvement.

There were mixed opinions regarding the internal assessment system, with some students rating it as "Good" or "Very Good," while others found it less conducive to their learning experience. Feedback on library holdings and availability of prescribed readings showed room for enhancement, with suggestions for improving resources and accessibility.

Overall, students rated the student-teacher relationship positively, both at the college and department levels. However, a few students indicated areas where further strengthening could be beneficial. Feedback regarding administrative office, health care facilities, and extracurricular activities varied. While some students rated these aspects positively, others suggested areas for improvement and greater support.

Students generally expressed positive sentiments about their post-college perception of the college.

The college has taken the following actions based on the feedback received:

1. Curriculum Enhancement: Conducted a comprehensive review of course content and learning values to address areas highlighted by students as needing improvement.
2. Internal Assessment System: Implemented changes and refinements to the internal assessment system based on feedback to enhance its effectiveness.
3. Library and Resources: Procured additional resources and worked on improving access to prescribed readings in response to student suggestions.
4. Student-Teacher Relationship: Organized workshops, seminars, and programs aimed at strengthening the student-teacher relationship across the college and within departments.

5. Facilities and Extracurricular Activities: Conducted assessments and made improvements in administrative processes, health care facilities, and support for extracurricular activities to better meet student needs.

6. Post-College Perception: Implemented strategies to ensure a positive post-college perception of the college among students, including alumni engagement initiatives and continuous communication channels.
